THE KEURIG® B3000SE: This, our largest and most advanced brewing system, is packed with features. The Keurig B3000SE is the way large offices make the coffee you, your office and your customers will love.

**KEEP IT CLEAN:** K-CUP AUTO-EJECT & EASY-TO-EMPTY BIN

After brewing, each K-Cup® Portion Pack auto-ejects and drops into a convenient K-Cup storage bin for later disposal. The brewer alerts you when the bin is full. If more used K-Cup storage is needed, a platform with a 70 K-Cup bin can be added.

AUTOMATIC REFILLS: DIRECT-WATER-LINE PLUMBING

With the brewer directly connected to a water-line, you can brew a new cup of coffee every 60 seconds without having to refill.

READ ALL ABOUT IT: EASY-TO-READ LCD INTERFACE

It's foolproof. The B3000SE's interface walks you through the brewing process in easy-to-follow steps, in your choice of three different languages — English, Spanish or French. Along the way, you can select from four brew sizes. There's even a hot water only selection.

SATISFY EVERY TASTE: FOUR BREW SIZES

Choose from four different brew strengths — from an intense 4 oz. brew that is ideal for iced coffee or espresso-like drinks, all the way to our milder 10 oz. brew. Because tastes differ.

FLIP AND FILL: DRIP TRAY FLIPS FOR TRAVEL MUGS

The large-capacity drip tray flips to accommodate travel mugs. It is designed for easy cleanup and versatility, plus it's dishwasher safe and easy to remove.

AN EYE FOR DETAILS: MUG AND K-CUP SENSORS

Can't think before your first cup? This brewer can. The B3000SE alerts you if there is no mug or K-Cup present, so there are no spills or accidental brewing without a K-Cup.

HARD WORKER: COMMERCIAL GRADE

This brewer is a rugged machine, built to commercial specifications and UL-approved for commercial use.

DRAIN AND STORE: DRAINABLE INTERNAL HOT WATER TANK

You can't get this from a home brewer. Only Keurig commercial brewers offer the option to easily drain and remove water from the internal hot water tank for long-term storage.

RECOUP COSTS: A VENDING OPTION

Make great coffee. And offset some of your costs. The Keurig B3000SE can be paired with a coin changer that takes US and Canadian coins: nickels, dimes, quarters and Canadian dollars.

KEURIG

KEURIG® IS NOT JUST ABOUT GREAT COFFEE. IT'S ABOUT THE WAY GREAT COFFEE IS MADE.

Keurig has redefined brewing by combining state-of-the-art brewer technology with our unique and patented K-Cup® Portion Pack. Within the K-Cup are all of the essential elements for brewing a single, perfect cup of coffee. So you get coffee you love, from a selection of over 200 varieties. But what you don't get is waste, mess or fuss. It's that simple.

1   **LIFT** the brew handle and place K-Cup® Portion Pack

2   **PLACE** mug and close the handle

3   **SELECT** one of FOUR cup sizes (4 oz., 6 oz., 8 oz. or 10 oz.) and press the button

B3000 **SE**

CHOOSE

Choose from over 200 varieties of gourmet branded coffees, teas and hot cocoa.

BREW

It's never been easier to brew the perfect cup of coffee in under a minute.
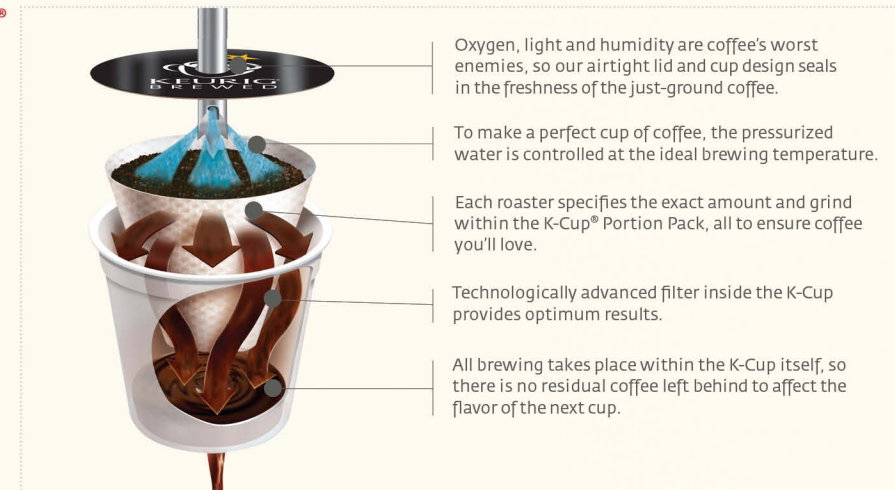

ENJOY®

Here it is. The coffee (or tea, or hot cocoa) you love. Easy, convenient and quick, with no mess to clean up.

SHARE THE LOVE: 200+ VARIETIES

Why should everyone fill their cups from the same old boring pot when they can have a choice? There are over 200 varieties of coffee, tea, hot cocoa or brew over ice beverages available from over a dozen of the world's finest coffee and tea brands. So you can stock as many varieties as you want. With Keurig, everyone can brew the coffee they love.

HOW THE K-CUP® WORKS

Oxygen, light and humidity are coffee's worst enemies, so our airtight lid and cup design seals in the freshness of the just-ground coffee.

To make a perfect cup of coffee, the pressurized water is controlled at the ideal brewing temperature.

Each roaster specifies the exact amount and grind within the K-Cup® Portion Pack, all to ensure coffee you'll love.

Technologically advanced filter inside the K-Cup provides optimum results.

All brewing takes place within the K-Cup itself, so there is no residual coffee left behind to affect the flavor of the next cup.
